Summary:

Results-driven Software Engineer with 3+ years of experience in full-stack development specializing in React.js, TypeScript, and Node.js. Proven expertise in building and deploying live production applications, implementing comprehensive testing strategies, and delivering scalable solutions. Awarded Employee of the Quarter for outstanding contributions. Seeking to leverage technical skills in impactful projects.

Professional Experience:

Hazel Soft, Lahore

Software Engineer

Nov 2024 - Present

- Developed web applications using React.js Material UI, Tailwind Css, Bootstrap, Redux Toolkit etc, for enterprise clients, ensuring high performance and scalability.
- Implemented comprehensive testing strategies (unit, integration, E2E) improving code quality by 40%.
- Deployed and managed live production applications on Ubuntu servers, ensuring 99.9% uptime and optimal performance.

Associate Software Engineer

Feb 2023 - Nov 2024

- Built responsive and interactive user interfaces using React.js, Redux, and Tailwind CSS for live production applications.
- Participated in code reviews and contributed to team best practices, reducing bug reports by 25%.
- Collaborated with cross-functional teams ensuring seamless integration between frontend and backend systems.

Intern Software Engineer

Nov 2022 - Feb 2023

- Assisted in developing front-end features for web applications using React.js and modern JavaScript.
- Collaborated with senior developers on bug fixes and feature enhancements using Git version control.

Projects:

Salar Star Cricket Academy Landing Page

February 2026

- Next.js web development for cricket academy.
- Created a live landing page website with a content management system showcasing teams, players, events, and news.
- Built with Next.js for optimal performance and SEO. Currently in production.

Golden Jasmine Management System

February 2025 - March 2025

- Full-stack development for Saudi-based logistics company managing 20+ trucks.
- Features include Trip Management, Profit Calculation, Salary, Dues, Assets, Loans, and Expenses Management.
- Built with React TypeScript, Node.js (Express), MongoDB, and deployed on Contabo Ubuntu Server. Live in production.

Jarvis Testing Framework

November 2024 - December 2024

- Created a comprehensive unit testing suite improving code quality and reliability across multiple live projects.

Call it What You Wanna E-commerce Platform

May 2024 - September 2024

- Next.js e-commerce development.
- Developed a full-featured e-commerce store and admin site with responsive design. Successfully deployed and currently serving live customers.

Feedback (Survey & Performance Management)

February 2023 - Present

- Built live survey builder application with performance calculation and customer engagement features. Includes built-in inbox for email communication with customers showing negative feedback.

Full Rail - Order & Marketing Campaign Management

February 2023 - Present

- Developed a comprehensive order management system with campaign tracking and analytics using React.js. Live and actively manage campaigns.

Skills:
